Hazardous duty

Russell Grinnell, a pest specialist with Live Oak Pest Control, discards pieces of a yellow jacket nest about the size of a basketball Friday from the base of an oak tree at a home on Southeast Evergreen Drive and Southeast Moses Way. 'Yellow jackets are most problematic because they go into a lot of residential areas,' Grinnell said. 'The best thing to do is to stay away from them as much as possible. Keep the foot traffic away. They are more active when it is (warmer) outside.'
